Black Hat: Security, Disruptions, & Compliance Black Hat: Security, Disruptions, & Compliance BY MICHAEL STERN The number of conferences has exploded. Last year it was 12, this year the tally is more than 30. Is there a meaning behind this? What are the common characteristics? What do these events mean to you? The Black Hat Europe Conference is among the world's most important infosec conferences and it happens only once every year. On August 29-30, a joint presentation by Black Hat Europe and ISS World at the GDS will kick off the conference with a bang. If there is a topic you're interested in, this is the place to be. After all, it's the largest gathering of experts and students in the world. The complexity of the situation Looking at the topics covered by attendees at the conference there are several themes that are apparent. Who are the hackers and why do they do what they do? It seems that everyone is interested in this, especially the students of cybersecurity. A student attending the conference this year was so inspired that he even requested to give a talk about cybersecurity for humanity. There's a serious aura surrounding the whole area, and it's becoming even more pronounced as the problem is being taken more seriously. What do hackers want from the world? When someone tries to explain the hacker perspective and lifestyle, it can be quite difficult. Even to ask the wrong questions means you'll get a somewhat odd answer. That's why I want to give a few concrete examples. What it means to be a hacker in the age of cyberwar In 2014, the mainstream media sensationalized the attacks on Sony Pictures and other entertainment companies by hackers, who accessed Sony's internal documents in order to distribute in the media the compromising personal and confidential information of Sony employees. According to the New York Times, Sony Pictures Entertainment was hacked in 2014, releasing details of the internal operations of the company and terabytes of confidential information including plans for future films. How will the modern concept of a hacker change in the age of cyberwar? How can we see hackers working in today's world? I want to take a look. A digital divide in today's age It is predicted that, by 2020, the world will be composed of 4.5 billion smartphone users. In a world of an estimated 6.9 billion people, we have a digital divide of more
