The original Photoshop was released in 1990. A new version was released in 1993 with a number of changes, including a new user interface, work space, and video compatibility. In 1995, Adobe PhotoShop Photo-editing software added the capability to cut out objects from an image and replace them with others or remove them entirely. It also added the ability to create layers, which lets you move and reposition the object in the image and apply special effects to it. The new version came with an

Here are some of the main issues raised: An 8 month strike of San Miguel Bacoor employees is due to begin on Sept 4. San Miguel Industries Inc. said employee demands included a salary hike, a pension plan for employees who retire, the right to a "green card" which would allow them to transfer from one company to another, and the introduction of a social security system. ADVERTISEMENT The firm said it was first hit by the rising cost of living and then the peso's depreciation, which forced it to raise prices of its products and services. The company had said that like other businesses, it was adjusting to difficult times. It would have lowered prices if the demands were met, the company said. "We offer fair salaries and benefits, thus allowing our employees to deal with the rising cost of living," the company said. The company said it hoped that the strike would be fruitful and lasting not more than six months. Rising fuel prices hurt the country's business performance and a more effective management system would help companies like SMI, it said. SMI is the Philippines' biggest brewer and distiller of beer, including San Miguel Pale Pilsener and San Miguel Becedas, and the second biggest distiller. Last year, the company recorded a net income of P7.36 billion and a profit of P2.05 billion after taxes. Total assets climbed to P98.83 billion from P87.67 billion in 2009. The number of people employed in SMI's operations

rose to 143,000 from 139,000 in 2010. The company said it had a 45,000-strong workforce in the United States. I heard back from Southern Exposure and then was given permission to post their responses (which are all theirs and not mine) by Loyola Marymount University Assistant Professor of Journalism Dan Siroff. Dan, his assistant, Avi, and I have been on a not-so-little twitter bender. We tweet back and forth and even had a great discussion about word choice and pedagogy on this site. But I think I've found the most relevant question for these young people: Q: What is the biggest misconception young people have about journalists? Asking this question is also a misnomer. It seems to imply a questioner who is playing a game. It's simply about what is the single most damaging or upsetting misconception about journalists from these young people. The other thing I would caution people about is the desire to sound off over Twitter about the answers. I think these are legitimate questions and answers and they are important. What's more, even if someone has a negative view of journalists,
