What's New in the?

Easily create one or more virtual drives The first time the application runs you're required to create a new safe, with a setup window showing up with all the related details. A password is a mandatory requirement, with a virtual keyboard at your disposal in case you're suspicious about your keyboard. In addition, the password can be set only to activate when a specific USB flash drive is plugged in. Throughout the safe setup process, you also need to specify a location for the physical item. It can be placed on a personal USB flash drive for even more security. However, you need to be careful how much space is allocated, so it's not too little or too much. Since it's a virtual drive, a corresponding letter can also be selected from a drop-down menu, and even make it automatically load on startup. Open and close safes with hotkeys When everything is configured, east-tec SafeBit brings up the main window, where general safe management options are available. A list shows all created safes, with the possibility to create more than one. Moreover, you can choose which to lock or leave active, with a corresponding icon and letter appearing alongside existing, real ones. Luckily, the application can be minimized when not used. Moreover, it can be triggered with the help of hotkeys, which can be configured from the settings panel to open and close safes. The application can be made to run with Windows, and even

launch File Explorer with the target drive when a safe is opened. To end with All things considered, we come to the conclusion that east-tec SafeBit is a reliable application you can use to create virtual drives in which to store important files and folders, locking them down and hiding them with a custom password. Drives can be fitted with a custom amount of MB, and even carried around, making this application worth a try overall. With the popularity of Bitcoin, so much of many people choose to invest in it, that they search for the best trusted sites that are able to provide them with reliable and advanced features. Bitfloor is one of these sites that have been gaining more and more people in just a short span of time.
