An XML database interface and python API are available. This is used by the WorldWind plug-in for AutoCAD Product Key to create and display 3D models from architectural drawings. It also provides the interface for building and managing 3D models in AutoCAD using WorldWind. Third-party products, including plug-ins for CAD applications,

can add features to AutoCAD, and in return they are licensed by the end user. These products are available via the AutoCAD Online Store. Features A CADDY is a plug-in that provides

interactive control of the center point, scale and rotation of a linework or surface. It can be used to create, edit, move, rotate or mirror arbitrary layers of the drawing. It also gives access to the Layers panel and the Properties palette, which allows for the editing of many properties of layers, including hidden layers. It also allows for the creation
