"To whom much is given, much is required." The Old Testament text says this. In all things, there is a reason behind the way things are. A reason why things work the way they do. For example, even though it may seem difficult at first to play these massive online games, they are easy to use and enjoy. There is a reason for all of this. Some things are a beautiful legacy. These are works that possess an existence that transcends the time and place where they were created. There is a reason for this. Many things are based on an event that occurred 2,000 years ago. There is a reason for this. For some things, there is a history that leads right back to the beginning of this world. There is a reason for this. For others, certain things just exist, and many hours pass by because of them. There is a reason for this. The Tarnished King is one such thing. It is the reason for all of these things, and it is the reason that the Tarnished King exists in the lands between. NOTES: ~ A Game Developed in the Completely Different Worlds Between the Worlds Secluded from the distant worlds of fantasy and action, the Tarnished King is a game that is created in an entirely different world. The setting of the game is in the lands between the cities of the Faerieland, so please do not confuse it with the world of fantasy. The Tarnished King was developed with the idea of creating a game that is completely different from the usual fantasy role-playing games that are popular overseas and in America. There are a lot of new elements that you wouldn't expect from a fantasy role-playing game, and what is more, they are all unique to the setting of the game. In other words, this is a completely different game. ~ With New Elements, The Old Rules Aren't Changing The game world of the Tarnished King is also in a completely different setting, and the Tarnished King's rules are different from the typical role-playing games that you have played in the past. The character creation part of the game is unique in that you can freely mix and match weapons, armor, and magic, to create your own character. New elements that you've never seen before are added to the action parts of the game, and we have crafted powerful stories that you

Features Key:

Combat: In comes the typical tactical RPG combat that most other games don't cover. Between your capacity for killing enemies and summoning allies, new tactics will arise.
