Ocean's Eleven', Ocean's Twelve, Ocean's Thirteen, Ocean's Fourteen. The boys in blue and the girls in black are more than your average gang of pirates. Their names are entered in the Guinness Book of World Records, they walk the mean streets of London, they're back on top of the world. They are the Game Factory Pirates! We work on games, we are indie game developers, and we want you to play our games. Play 2 games at the same time, play them in Multiplayer, or create a gamepad profile and drop it into your library of games! We have a mobile game, a browser game, a Facebook game, and a Unity platform game! Everything but one Steam game so far, but we are working on that! This is your chance to be a part of history! We do not work just as a team, we all have a say in everything! Just like a family would, we all have an opinion, we all make decisions and we all accept responsibility for it. We will work the entire weekend, and when we're done, you will have your own copy of the game! **Update** We're still on track to release the game on Friday, as mentioned in our previous post. We have added just a few more fixes, and we have released the Steam version of the game to the public! The game is still available on the EU and North American servers, as well as the Ocean's Eleven, Ocean's Twelve, and Ocean's Thirteen Map Pack. The only thing you need to know, is that we will be shutting the servers down this Thursday and Friday for maintenance, from 00:00 UTC on Friday to 23:59 UTC on Monday, April 30th. This means that there will be no activity allowed from the game, and you will not be able to log in! In the meantime, we'll keep you posted on our progress on both our Twitter account, and our Forum! Planned to release on Friday, April 7th, 2013. For more information, please visit our Website. **Update** We're closing in on the release of Ocean's Eleven! We're building towards a release of the first complete version of the game tomorrow morning, and we'll be setting things up to ensure that the servers are

Release Notes

RPG Maker MZ Midnight City version 22.8.11 (Build 15465) is the latest release of the modern day RPG Maker game. Unlike previous versions of this game we have made effort to correct various things that were wrong or out of date and designed the game to be more friendly to new developers. The latest monsters and jobs have been added to the game and certain bugs and things that weren't working right have also been fixed.

For example, two critical bugs that were present in versions prior to this release have been removed.

Bugs that have been fixed:

- General monsters that prevented other monsters from joining the battlefield.
- Certain minor UI glitches that weren't present in the games released prior to this release.

Broken Dungeon is a VR dungeon crawl through procedurally generated dungeon layouts. The adventurer must make their way through the dungeon, looting the rooms as they go, avoiding traps and monsters, and defeating the dungeon's invader. The Dungeon Master uses a number of different abilities to affect the adventurer, both directly and indirectly. The Dungeon Master must use these abilities carefully to successfully direct the battle between the adventurers and the invader and to ensure his or her own survival. Play as both the Dungeon Master and the adventurer, or as the Dungeon Master and choose to play as the adventurer in a head to head duel with the Dungeon Master. The Great Race offers for the first time this add-on to practice and perform with FS2. The add-on gives the possibility to use SA V2 or V3 class locos. When working in standard 5T locos the add-on works well. If you like, you can also use this add-on in FSX. There are some additional features, such as Brake Indicators on the Locos. The Brake Indicator lights up a LED in the cab when the brake coach out of delay. To change the indicators to LED display. for FS2 and FSX, select the Loco Type (SA 2 or SA3 Class) using the Add-on settings from Rail Simulator (New Version). There is more information in the readme file. Description: For some years the real Locos in BR standard have formed a great attraction for many players. Have more fun with this add-on. Features • FS2 Import/Export - multiple scenery size support • FSX Import/Export - multiple scenery size support • SA 2 Class locos - with gearbox 2MT version - operation in FS2 • SA 3 Class locos - operation in FS2/FSX(New) Different features for the FS2 and FSX versions and some setting options to make the experience better. The following things are allowed for FS2: 1. Horizontal Levels: There is a setting for all versions to use a separate horizontal position for each station, when entering at a terrain. 2. Auto gearbox: When you train in the vehicle, not -1, but +1 gearbox for each station is enabled. 3. Forward-Backward: This feature is activated by default. The default setup will click every station for forward and backward movement. 4. Depot: You will have to change the following 3 settings: 1. Track Direction: -4 forward movement -4 backward movement 2. BOM: Set road with road only. In BOM the track direction is forward. 3. Brake Plastic Wheel Limit: User Additional 5 for 0% - Black Plastic Wheels - 50% - Maximum Brake Distance. It is displayed in the number set up with the setting. 5. Trains: Set the counting mode forward or backward station. If you want forward selected, then set forward stop. If want backward selected
