The best thing about this game is its unique play-style. Make your friends and enemies jump out from different sides of screen using the very basic lock-on mechanics. Also you have the power to change the direction of the camera at any time, by moving your controller to the right or left and pressing left or right on the D-pad. Have fun! Trailer: The game is in alpha stage, and version 0.0.1 has some bugs so we are looking to fix those as soon as possible. One thing to mention is that there is a chance the game will be a timed beta, this means that beta testers will get some sort of extra goodies to compensate for it, and it is entirely optional. We are looking forward to get your feedback and progress the game as much as possible. ]>Dignitas 22 Jan 2016 16:48:30 +0000 We have invited a new voice actor, he has channels on YouTube and twitch We have invited a new voice actor, he has channels on YouTube and twitch link to youtube: About This Game: Dignitas is a team game where players need to avoid headshots and other deadly attacks while aiming for a point marked on the other side of the screen. BattlestarGinza is a game that includes over 200 military objects and outfits. Come ride with us now!!! The UnstoppableGames tome now arrives and this time we have a classic and my personal favorite, Santa. He managed to jump and walk and even ride his sleigh on top of other objects. As you see, he also can shoot with his bat and it saves Christmas from the big bad guy. He even pulls out his gun and hooks up with the aliens. Yes, Santa uses his weapon and he also uses it on his sleigh ( I didn't know he had a weapon on his sleigh). He can even blast something with his snowballs. Here you have the big fat Santa blasting the Big Bad Santa with his gun. To make you feel good, he plays his guitar and even sings Christmas Carol. How he uses his sleigh is worthy to a skill master. And he can even roll around the fire. If you think its not dangerous, well think again. I give it a 10/10. One of my favorite games on the site. SAVE 50%: Dangerous Santa

### What's new in Bikerz:

Welcome to the Official All-things-comic-centric RPG Trial of the Gods - the one, the only, the Greatest, Siralim. A comic book RPG that stretches across two stunningly beautiful worlds, where the gods - with even more worlds at their feet - will shape the future of your characters and push you to your limits. Next Monday, if all goes well, we will open up a new world to all players at E3 2014 and as soon as that happens I will be able to give you some juicy details on the new world and begin rolling some new adventures for you. So get those pictures in here quick and let's take a closer look at the world in which you will be able to slay the forces of evil in this 10 player, 30 session, written-by-comic-creator crossover RPG... Meet the World of Siralim Siralim is a world in which we - the players - are living out miniature human lives and politics play a major part in everyday life and major events. In Siralim, you will, at times, be able to get into something of a Stone-Age-like society of bandits, hunters and semi-nomadic tribes of humans. There will be urban spots like proud city-states, fixed settlements with farms, and great inter-factions between some of the civilisations in Siralim, and it is there that we will find out each character's backstory. We will get to know you and get to know each other and yes, it's always worth a take a closer look at your character. We will begin the game in the eastern part of Siralim where the setting of the game is our settlement of Arroyo. Siralim is currently where we have established a city of Kelemvor - the River God of swords - and the river breaks the eastern edge of the settlement. The river is a constant threat to the people who live near it and because of this they build a wall around the entire settlement to contain the river. If it wasn't for the wall the river would wash right through the settlement and the players will get to see how quickly the people of Arroyo start to get used to the isolation, however they don't simply build any old wall between the settlement and the river. Through the centuries the settlement has become more and more sophisticated and the wall has been built with the aid of
