Smartdraw 2014 Portable

in 8.2.17 Sprint - Complete on tiofacdilia. People are also asking me if it is something because they were installed (I don't know if this is relevant) ... When I run my app, I get "Sprint is not responding". I know it has to do with the fact that it doesn't work in Windows XP.

Then I reinstall it on XP, but it still doesn't work, and I reinstall it on Vista. I get an "Error: Sprint does not respond" message. And I don't know how I can solve it. I don't know what the error is.
