The agent features a smooth and articulated body and faces in 3 different expressions: neutral, angry, and happy. The faces are animated to express emotion while, in each case, the body moves to match the facial expression. The animations are generated using inverse kinematics and blend keyframes based on two sets of parameters: a global set of kinematic parameters and a set of local parameters defined at each joint. The design of the kinematics supports the use of human-human communication in animating human movements. The agent can be easily controlled to interact with people of all ages, and its movements can be modified to accommodate those of infants and children. In addition, the agent is fully f988f36e3a
