A: If you don't want to use Inno Setup for no good reason, why not just try Wix? It's easier to use than Inno Setup, and it supports English. A: There's also SoftInno Setup and SoftIWZ (and I think more) SoftInno Setup is just a free alternative to Inno Setup. You can build the installer with it and it includes a GUI (just like Inno Setup) and it's also possible to create uninstallers with it. SoftIWZ is an extra plugin to Inno Setup. You can add it and it works like an Inno Setup compiler but it's more powerful. It also has a GUI but i'm not sure if it can build uninstallers (last time i used it, it couldn't). Re: What does "going all the way" mean? > well, in reality, I've had > a lover of several years, > but I have never been "all the way" because I had to keep him > interested. Might that be because he was gay? I've dated two guys who were straight--and one of them was VERY straight--but there were no questions about my being "all the way" with either one of them. In the cases of the two that were straight, I had to go "all the way"--but I was willing to go "all the way" with both of them--which I was. I think that it depends on a couple of things. I certainly didn

I'm trying to figure out the meaning of the term "common-good problem" in IZA Working Paper 72, "Differentiated consumption in the model of a basic income: A population game", but can't find any useful definition in its abstract. A: A common good is usually seen as something which is either "in the public interest" or "part of the collective good". It 2edc1e01e8

## X-ISTool

X-ISTool is a software utility that can be used to help individuals write installation scripts with great ease, as well as run and compile them. Portability advantages This is the portable version of ISTool, which means you are not required to go through the installation process. As a consequence, it will not add entries to the Windows registry or hard drive, without your approval (as installers do), and it will not leave any traces behind. Another important aspect is that you can copy the program files to any location on the computer, and run it with just a click on the EXE. Furthermore, if you move the last mentioned files to a removable storage device, such as a USB drive, you can run X-ISTool on any computer you can connect to. Simple-to-use interface and configurable settings The UI you are met with boasts a simple design which only consists of a menu bar, several shortcut buttons, a sections panel and another one to display details. It is accessible to both beginners and experienced individuals. It supports import from ISS, LST, IWZ, REG and INI files, while export is possible only to ISS and REG formats. You can input installer registry data needs, files and directories it requires to ass, as well as establish tasks, input several languages and create an uninstaller also. From the options panel, you can merge duplicate files, choose compression type (ZIP, LZMA or BZIP) and output directory, set up logging, enable or disable disk spacing and adjust privileges required. Moreover, you can directly connect to the compiler and run a test of the setup. Conclusion All in all, X-ISTool is an efficient piece of software which enables you to create installation scripts for the Inno Setup compiler. It has a good response time, it can be used by anybody and the computer's performance is not burdened, as the CPU and memory usage is minimal. A: You can use the script editor to create a single text file with a name and extension of your choice and then have an installer program read the script file and execute the commands it contains. There's lots of info on the web about how to do this, but a google search of 'script editor tutorial' should do the trick. Q: How to load TFS Items from different client machine to server and then process them? I have a project with
